Montage Main article: Montage is the technique by which separate pieces of film are selected, edited, and then pieced together to make a new section of film. A scene could show a man going into battle, with flashbacks to his youth and to his home-life and with added special effects, placed into the film after filming is complete. As these were all filmed separately, and perhaps with different actors, the final version is called a montage. Directors developed a theory of montage, beginning with Eisenstein and the complex juxtaposition of images in his film Battleship Potemkin.3 Incorporation of musical and visual counterpoint, and scene development through mise en scene, editing, and effects has led to more complex techniques comparable to those used in opera and ballet.

Distribution Main articles: Film distribution and Film release. Film distribution is the process through which a film is made available for viewing by an audience. This is normally the task of a professional film distributor, who would determine the marketing strategy of the film, the media by which a film is to be exhibited or made available for viewing, and may set the release date and other matters. The film may be exhibited directly to the public either through a movie theater historically the main way films were distributed or television for personal home viewing including on DVD-Video or Blu-ray Disc, video-on-demand, online downloading, television programs through broadcast syndication etc.. Other ways of distributing a film include rental or personal purchase of the film in a variety of media and formats, such as VHS tape or DVD, or Internet downloading or streaming using a computer.

On June 5, 2020, Governor of California Gavin Newsom announced that film and television production could resume in the state beginning June 12, provided that conditions permit and approval is received from a countys public health officials.170 Newsom incorporated key guidelines from the task forces report.171 The next day, a group of unions including the Directors Guild of America, the International Alliance of Theatrical Stage Employees, the

International Brotherhood of Teamsters, and SAG-AFTRA published a 36-page report detailing safety protocols agreed upon for union film and television productions, including regular testing of cast and crew members, closed sets, access zones, shooting limited to ten hour sessions, and all productions requiring an on-set health safety supervisor.172173 On February 9, 2021, it was announced that Blue Sky Studios, an animation studio which had been acquired by Disney during its purchase of 21st Century Fox, would be closed due to the economic impact of the pandemic on their business operations. The closure of Blue Sky also resulted in its cancellation of a film adaptation of Nimona, which was reported to be 75% complete
